

*Before you start*

Registering with SSM

Everything you will be asked for, with the wording already written. Keep this open in one window and EzBiz in the other, and copy across.

Check the live figures before you pay. Fees, forms and the MSIC code list are set by SSM and do change. Everything here is a preparation aid so you are not writing your business description in a panic at 1am — the numbers on **ezbiz.ssm.com.my** are the ones that count. If anything in the form contradicts this sheet, the form is right.

WHAT YOU ARE REGISTERING AS

A **sole proprietorship** (Perniagaan Milik Tunggal) — one owner, registered under the Registration of Businesses Act. It is the right shape for you now: cheapest, fastest, no company secretary, no audited accounts. You can convert to an Sdn Bhd later if you ever need to take on a partner or limit liability.

Two ways to register the name

OPTION	WHAT IT MEANS	NOTES
Personal name Nama sendiri	The business trades under your own name exactly as it appears on your IC — <i>Nur Badzlina Razi binti Mohamed Gazali.</i>	Cheaper, and no name approval needed. But it is not your brand.
Trade name Nama tred	The business trades as NOVA BADZLINA GLOBAL.	Costs more per year and needs name approval first. This is the one you want — it matches your website, invoices, contracts and bank account.

Why the trade name matters for you specifically. Every document you already have — the booking agreement, invoices, receipts, rate card — says NOVA BADZLINA GLOBAL. A brand paying you wants the name on the invoice to match the name on the bank account. Registering the personal name only would mean redoing all of it.

HAVE THESE READY BEFORE YOU OPEN THE FORM

1. **Your MyKad** — number and full name exactly as printed.
2. **An EzBiz account** — register at ezbiz.ssm.com.my first. First-time users must verify their identity; check the current method on the site, as it has changed before (counter verification has been required in the past).
3. **Your business address** in Kota Bharu, Kelantan, with postcode.
4. **A start date** for the business — see page 2.
5. **Online banking or a card** to pay the fee.
6. **Two or three backup names** in case the first is rejected — see page 2.

What to type

THE NAME

BUSINESS NAME — TYPE EXACTLY THIS

NOVA BADZLINA GLOBAL

Have backups ready. SSM restricts certain words in business names, and approval is not guaranteed. If *GLOBAL* is queried, do not panic and do not accept a name you dislike just to get through — you would be stuck with it on every invoice. Try, in this order:

1. NOVA BADZLINA GLOBAL
2. NOVA BADZLINA STUDIO
3. NOVA BADZLINA CREATIVE
4. ARA ARANYA STUDIO

Anything except the first would mean updating your website and documents — tell me and I will sweep every file in one pass.

DATES AND ADDRESS

FIELD	WHAT TO ENTER
Business commencement date Tarikh mula perniagaan	The date you actually started taking work. Do not backdate it far — you are declaring you were trading from then.
Registration period	You choose 1 to 5 years. Take at least 2 or 3 — it costs less per year and it is one less renewal to forget while you are studying.
Business address	Your address in Kota Bharu, Kelantan , with postcode. This is where the business operates.
Mailing address	Same as above, unless you want post elsewhere.
Business type	Sole proprietorship — owner only, no partners.

On using a home address. Whatever you enter becomes searchable on SSM's business register. If you would rather your home address not be public — a fair concern given your situation — ask SSM what alternatives they accept before you submit, rather than after.

NATURE OF BUSINESS — THE DESCRIPTION

Most people leave this vague and regret it, because banks read it when you open a business account. Keep it specific and recognisable.

SHORT VERSION — IF THE FIELD IS TIGHT

Content creation, user-generated content (UGC) production, video editing, product photography, voice-over services, affiliate marketing and live commerce hosting.

LONGER VERSION — IF THERE IS ROOM

Production of user-generated content (UGC) and short-form video for brands; video editing; product photography and photo editing; voice-over and voice acting; live commerce hosting on e-commerce and social platforms; affiliate marketing; influencer marketing and brand ambassador services; sponsored reviews.

MSIC codes

EzBiz asks you to pick **MSIC codes** — standard classification numbers for what your business does. You normally select more than one. This is the field people get wrong, and a wrong code can cause questions later when you open a bank account.

Do not copy code numbers from anywhere, including this page. MSIC codes are revised, and quoting a stale number is worse than searching properly. Use the search box inside EzBiz and pick from what it actually returns.

Search these words in the MSIC picker

TYPE THIS IN THE SEARCH	WHAT YOU ARE LOOKING FOR
advertising	Advertising services — usually the closest fit for UGC and brand content work.
motion picture / video	Video production activities.
post-production	Video editing.
photographic	Photography activities — covers product photography.
sound recording	Voice-over and audio production.
retail / electronic	Online and e-commerce related selling — relevant to live commerce hosting.
creative / arts	Creative and performing arts — commercial talent work.

Pick the **advertising** one as your primary if the form asks for a main activity. It is the broadest umbrella for what you actually sell, and it is the one a bank will recognise immediately as a real trade.

ROUGHLY WHAT IT COSTS

ITEM	NOTE
Trade name registration	Charged per year. Multiply by the number of years you choose.
Personal name registration	Cheaper per year, but not your brand.
Business Info printout	A small extra fee. Buy this — the bank will ask for it.
Branch registration	Only if you register additional premises. You do not need this.

Exact amounts are on EzBiz at the payment step. It is an inexpensive registration — budget under a couple of hundred ringgit for several years plus the printout.

AFTER IT IS APPROVED

1. **Download the certificate and the Business Info printout.** Keep both in the same folder as your contracts.
2. **Open a business bank account** in the business name. Maybank will want the certificate, the printout and your IC. This is the real prize — a client paying *NOVA BADZLINA GLOBAL* rather than a personal account looks materially more serious.
3. **Send me the registration number** and I will add it to your invoices, receipts, booking agreement, rate card and website footer. Brands and agencies often ask for it before they can raise a purchase order.
4. **Diarise the renewal** before it expires. A lapsed registration is a re-registration.

One thing to be aware of. A sole proprietorship is not a separate legal person — the business and you are the same in law, so business debts are personal debts. At your scale that is normally fine, and it is what almost every creator starts with. It is only

worth revisiting if you ever take on staff, sign a large liability, or bring in a partner.
